Subject: Motivation Letter for Master's Program in Data Science – University of Padua

Dear Members of the Admission Committee,

I am writing to express my strong interest in the Master's program in Data Science at the University of Padua. I am currently pursuing a Bachelor's degree in Computer Science (Big Data) at the Higher Institute of Computer Science and Multimedia of Sfax, with an expected graduation in June 2026. My academic training, combined with practical experience in data analysis, business intelligence, and web development, has equipped me with a solid foundation to excel in your program.

Through internships at COFICAB and Digixi, I gained hands-on experience in designing interactive dashboards, implementing AI-powered solutions, optimizing web applications, and transforming data into actionable insights. These experiences sharpened my analytical thinking, problem-solving abilities, and capacity to manage end-to-end data-driven projects. Complementing my professional experience, I completed specialized trainings with NVIDIA on AI applications and transformer-based NLP, and certifications from USAID in project management and data analysis. These experiences strengthened both my technical expertise and leadership skills, preparing me to engage rigorously with modules such as **Statistical Learning, Machine Learning, Big Data Computing, and Deep Learning**, which are central to your Master's curriculum.

I am particularly drawn to the University of Padua's program because of its integration of core computational methods with real-world applications in business, finance, and biological data. I am highly motivated to apply advanced data modeling, optimization, and AI techniques while contributing to research projects that drive innovation and impact.

I am confident that my academic background, ongoing studies, and professional experiences align closely with the program's objectives. Pursuing this Master's will enable me to deepen my expertise in Data Science and apply my skills to develop meaningful solutions across industries.

Thank you for considering my application. I look forward to the opportunity to contribute to and grow within the University of Padua community.

Sincerely,
Khalil Ben Anane
